* National recycling rates include in consumption newspaper inserts such as magazines and TV guides which are printed on newsprint or improved newsprint but only includes newsprint, or improved newsprint, used for newspaper manufacture

- Figures are expressed as tonnes per year (tpy)

- Total newsprint recycled includes publishers' waste and old newspapers (abbreviated as ONP)

- A percentage of consumption consists of cores, end caps and wrappers

- Tonnages for post consumer recovery rate is calculated after publishers waste is deducted from consumption

- ONP tonnages from household collections vary from 32-100% of total paper collected

- Alternative technologies have been added to the "other column" for 2002, this includes processes such as composting and energy from waste

- Prepared by News Limited's Environmental Secretariat (02-92882234)
